

### Mesohair

If your hair is thinning or falling out, Dr Dray's unique Mesohair treatment is the answer. The course uses painless scalp micro-injections of minerals, vitamins and DHT blockers – DHT is the hormone that causes hair loss – to increase the circulation to the scalp and stimulate hair follicles. After only a few sessions, your hair will be looking thicker, brighter and more lustrous.

### Lips

'Never too much but always sexy' is the Dr Dray motto when it comes to making the most of your lips. After a careful consultation, Dr Dray will shape, enhance and subtly plump your lips using natural hyaluronic acid injections to give you kissable lips again. The key, he says, is to always make sure they look natural and in keeping with the rest of your face.

### Hands

Always an age giveaway, hands are one of the first places to show the effects of time. If your hands are bony, skinny or looking old, then Dr Dray has a quick and easy treatment that will restore youth. One 30-minute session of hydroxylapatite injections under local anaesthetic and you will leave the clinic with youthful-looking hands.

# HOLDING BACK THE YEARS

French dermatologist Dr Maurice Dray has the A-list flocking to his London clinic for his revolutionary 10-minute facelift and other innovative anti-ageing treatments

When it comes to ageing gracefully, the French lead the way and one of their top anti-ageing secrets is Dr Dray, the leading cosmetic doctor in Paris. Clients flock from all over the world for his ability to restore radiant complexions and roll back the years so subtly that no one would ever know you had seen him. Luckily, Dr Dray's keen eye and clever treatments are also available in

London at his hi-tech clinic in Kensington.

The key to his remarkable results is a careful evaluation of each client's skin and facial structure before recommending any of his treatments. One of his most effective procedures is an amazing 10-minute facelift, which has been called the perfect age-defying treatment. The hi-tech facelift increases the skin's collagen fibres, which are essential for moisturising the skin, improving its elasticity and reducing wrinkles.

It involves injections of biphasic tricalcium phosphates (BTCPS), a new biodegradable agent composed of phosphate and calcium ions suspended in hyaluronic acid, to create a facelift effect. The result is a smooth, radiant complexion and a lift to the face that can be seen almost immediately. Within six weeks, the real effects appear – new tissue, an increase in collagen fibres and improvement in elasticity – which last for 15 months, with just three sessions. According to Dr Dray, this treatment could hold back a surgical facelift for many years.

He is also famous as the founder of mesotherapy and the creator of the mesolift procedure – a non-surgical treatment that prevents skin ageing by hydrating it and encouraging the natural production of collagen.

Recommended to revitalise and hydrate dull, tired skin and plump sagging tissue, it involves shooting a cocktail of anti-ageing goodies, including aminoacids, copper, zinc, vitamins and hyaluronic acid into the skin with a micro-injection gun to stimulate collagen production – don't worry, Dr Dray's exceptionally strong numbing cream makes this almost painless. The result – luminous plump skin – is worth it.

For more focused anti-ageing needs, such as hair loss and ageing hands, Dr Dray has a host of treatments at his fingertips. His subtle genius with fillers is well known and he uses the latest generation of hyaluronic acid to plump out lines and wrinkles on the face and lips for a natural youthful look. If you are hoping to banish cellulite and lose fat, Dr Dray's hi-tech Millenium VIP machine reduces cellulite and burns fat cells. Used with lipodissolution, an injection of soy lecithin which helps to dissolve fat, the effect is a slimmer, smoother figure. The secret to that perfect Parisian style.
