

# Tender loving care

Give yourself a gentle lift with leading dermatologist Dr Maurice Dray's innovative anti-ageing treatments. It's the answer to regaining your youthful beauty, without going under the knife

If the time has come when your face needs a little TLC, make a note of the name Dr Maurice Dray. Renowned for giving a radiant glow to the complexion of A-listers, models and the cream

of society, this celebrated French dermatologist is in huge demand for his ability to turn back the years – without a scalpel in sight. The key to Dr Dray's remarkable results is a careful evaluation of each client's skin and facial structure before recommending any of his highly effective treatments.

At his hi-tech clinic in Kensington, Dr Dray's unique style of anti-ageing treatments are constantly in demand. In particular, the following three procedures are popular due to the incredibly natural, subtle results. No one will know why you suddenly look so much better – just a little TLC.

## Mesolift

Dr Dray is famous as the founder of the Mesolift procedure, a non-surgical treatment that hydrates skin and encourages the natural production of collagen. Recommended to revitalise and hydrate dull, tired skin and plump sagging tissue, it involves shooting a cocktail of anti-ageing goodies, such as aminoacids, copper and zinc, vitamins and hyaluronic acid, into the skin with a microinjection gun to stimulate collagen production. The effect is beautifully luminous, plump skin that looks so natural that no one will know.

## 10-minute facelift

According to Dr Dray, this treatment could hold back a surgical facelift for many years. It increases the skin's collagen fibres with injections of biphasic tricalcium phosphates (BTCPS), a new biodegradable agent composed of phosphate and calcium ions suspended in hyaluronic acid, to create a facelift effect.

The result is a smooth, radiant complexion and a lift to the face that can be seen almost immediately. And within six weeks, the real effects appear – new tissue, an increase in collagen fibres and improvement in elasticity –

which lasts for 15 months. The effect is subtle and very natural, as you would expect from a man who works with chic Parisians.

## Mesohair

If your face is looking fabulous but your hair leaves a little to be desired, Dr Dray's unique Mesohair treatment is the answer to hair that is thinning or falling out. A course of painless scalp micro-injections of minerals, vitamins and DHT blockers (DHT is the hormone that causes hair loss) will give you the thick,

lustrous hair you have always dreamed of before you know it – the perfect frame for your newly refreshed and confident face.
