

Forever young

Dr Dray's non-invasive treatments will leave skin glowing –
book into his Kensington clinic now

After more than 25 years in the industry, leading cosmetic doctor Dr Maurice Dray has unquestionably made a name for himself. His clinics in both London and Paris are regularly graced by a VIP clientele of A-listers and models, thanks to his ability to turn back the clock using natural, non-

invasive methods. Dedicated and diligent, Dr Dray scrupulously assesses the skin and facial structure of each and every patient prior to recommending procedures, ensuring each client is set up with the perfect tailor-made programme. What's more, as the founder and pioneer of mesotherapy and the creator of the mesolift procedure – a cocktail of vitamins A, C and E, minerals (zinc and copper) and vegetal DNA, which is injected into cells to revitalise the face – this super-suave doctor has unsurprisingly earned himself a respected reputation across the globe.

CLINIC DRAY

Besides Dr Dray's portfolio of show-stopping treatments, he has a distinctive knack for making his patients feel comfortable and at ease. And with a luxurious yet ultra-discreet clinic in the heart of Kensington, his London base is both private and welcoming. Equally enticing is his Paris-based clinic for jet-set clients scooting back and forth across the Channel.

10-minute facelift

We can't see why you wouldn't love Dr Dray's 10-minute facelift – this is beauty at speed. A non-invasive treatment, it can be used to target a multitude of sins, from banishing wrinkles and bringing life back to sagging jowls, chin and cheekbones. Man-made chemical injections, containing biphasic tricalcium phosphates (BTCPs), encourage the production of collagen – the connective tissue that keeps skin naturally firm when we're young. Amazingly, effects are instantly noticeable (with even better results showing after about six to eight weeks), with skin appearing smoother, younger and more radiant. What's more, results from the treatment regularly last up to 15 months. This is pure genius from the Miracle Man himself.

MESOLIFT

Although mesolift will be available at the majority of top cosmetic surgeries nowadays, the treatment was founded by Dr Dray himself. Swap dull and tired skin for a fresh and healthy glow with microinjections across the face and neck, designed to revitalise active substances. A concoction of amino acids, vitamins ABCE, hyaluronic acid and co-enzymes enter the skin, aiding tissue construction and boosting skin luminosity and texture. Tip: for best results, book yourself in for a series of treatments.

REFRESH Say goodbye to fine lines around the lips, eyes and cheeks with Dr Dray's latest and perhaps most super treatment, Refresh. An electronic syringe (complete with pedal to control quantities) is injected into the skin's dermis, producing gloriously glowing results. Plus, lips can be subtly refreshed with a natural brightness, without adding too much volume. No pain, no downtime – just skin that zings.

HAVE YOU HEARD...

Pssst – have you seen Dr Dray's newly relaunched website? The recently revamped digital arm is not only ultra stylish, but informative and simple to use. We love the mini demonstration videos of some of Dr Dray's best treatments. Visit it at drdray.co.uk

PLATELET RICH PLASMA

Losing weight is rewarding, but don't let your achievement be dampened by the saggy skin it can sometimes leave behind. Instead, be picture perfect and check yourself into Dr Dray's clinic for a Platelet Rich Plasma (PRP) session. The patient's own blood is injected into the skin, producing more collagen and, after two to three months, resulting in a younger, livelier and rosier-looking complexion. It's also a fantastic treatment for under the eyes to banish those dark circles. In most cases just one session is all it takes. Hey presto!

TATLER READER OFFER

Dr Dray is offering all *Tatler* readers a free consultation at his Kensington clinic. To book, please call 020 7937 1031 and quote 'Tatler'.
