

Clinic Dray, in both Paris and London, is ultra-discreet and ultra-chic. With 25 years experience, it is no wonder that A-listers flock to the leading cosmetic dermatologist Dr Dray. His ability to turn back the years using natural methods has earned him global recognition. He is perhaps most well known

as the founder of mesotherapy and the creator of the mesolift procedure – a non-surgical treatment that prevents skin ageing by hydrating it and encouraging the natural production of collagen. No scalpels, no knives, no magic wand, just a stroke of genius from the miracle man.

Miracle man

Dr Dray's ultra-discreet clinic in Kensington uses revolutionary methods to achieve a natural radiance

10-minute facelift

One of Dr Dray's best-loved procedures is the non-invasive wonder-treatment known as the 10-minute facelift. Only available at his clinics, it has become quite the headline-hogger. Using man-made chemical injections, biphasic tricalcium phosphates (BTCPs), skin is encouraged to produce collagen and restructure jowls, as well as restore volume to the chin and cheekbones. The skin often looks immediately smoother and more radiant with effects able to last up to a staggering 15 months. This age-defying treatment is a complete no brainer especially when it has the ability to achieve such sensational results in just 10 minutes.

FILLING IN TIME

Dr Dray uses the latest dermal fillers to great effect and totally swears by hyaluronic acid. A substance that is naturally present in the human body, injected as a gel it is perfect for filling in facial wrinkles, fine lines and giving lips a slight enhancement, as well as sculpting and adding volume.

TATLER READER OFFER

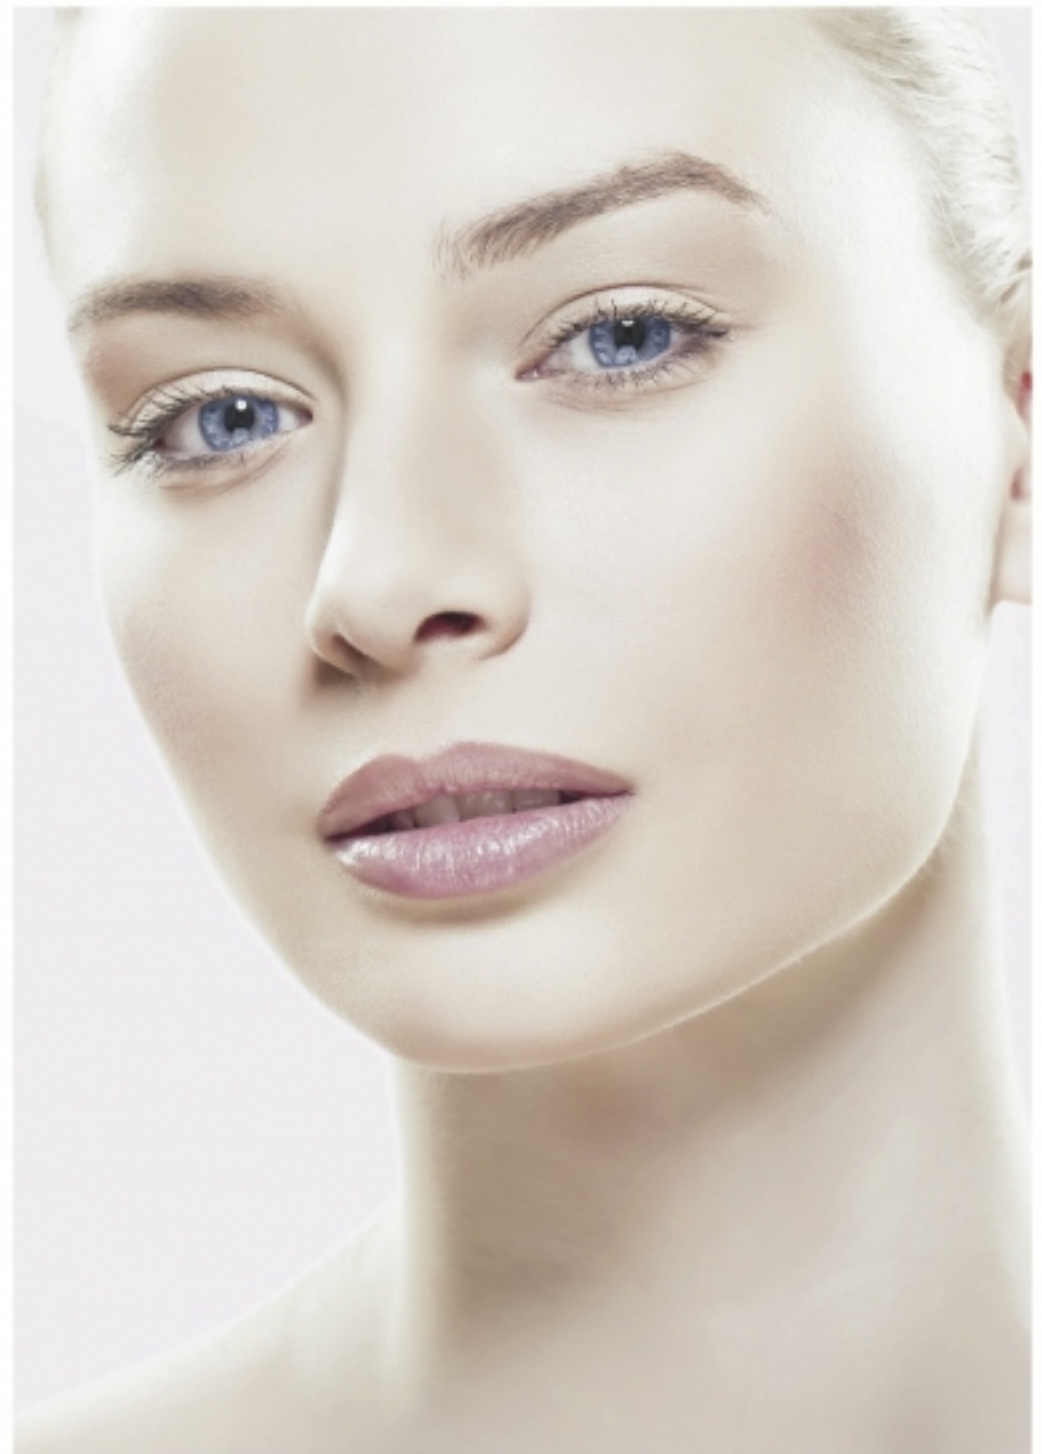

Dr Dray is offering all *Tatler* readers a free consultation at his Kensington clinic. To book, call 020 7937 1031 and quote 'Tatler'.

FRESH FACED

Both Dr Dray's London and Paris clinics offer Botox with excellent results. Concentrating mainly on the lines around the eyes, forehead and neck, the effects tend to last between four and six months. Botox can also be used to treat perspiration of the hands, armpits and feet.

PUT YOUR HANDS UP

Hands are a real telltale sign of ageing with looser skin, larger veins and age spots starting to appear. Dr Dray has customised a hand rejuvenation treatment to improve the skin's texture, tone and elasticity. He uses a variety of techniques with the secret ingredient being the fail-safe hyaluronic acid, encouraging the production of collagen which helps to minimise wrinkles and hide prominent veins. Usually after just one rejuvenating treatment hands look smoother, younger and fresher.
