

GOOD LOOKS

Renowned French dermatologist Dr Maurice Dray has the A-list flocking to his Kensington clinic for his revolutionary 10-minute facelift – not to mention a host of exciting and innovative anti-ageing treatments – all designed to bring out your inner Parisienne

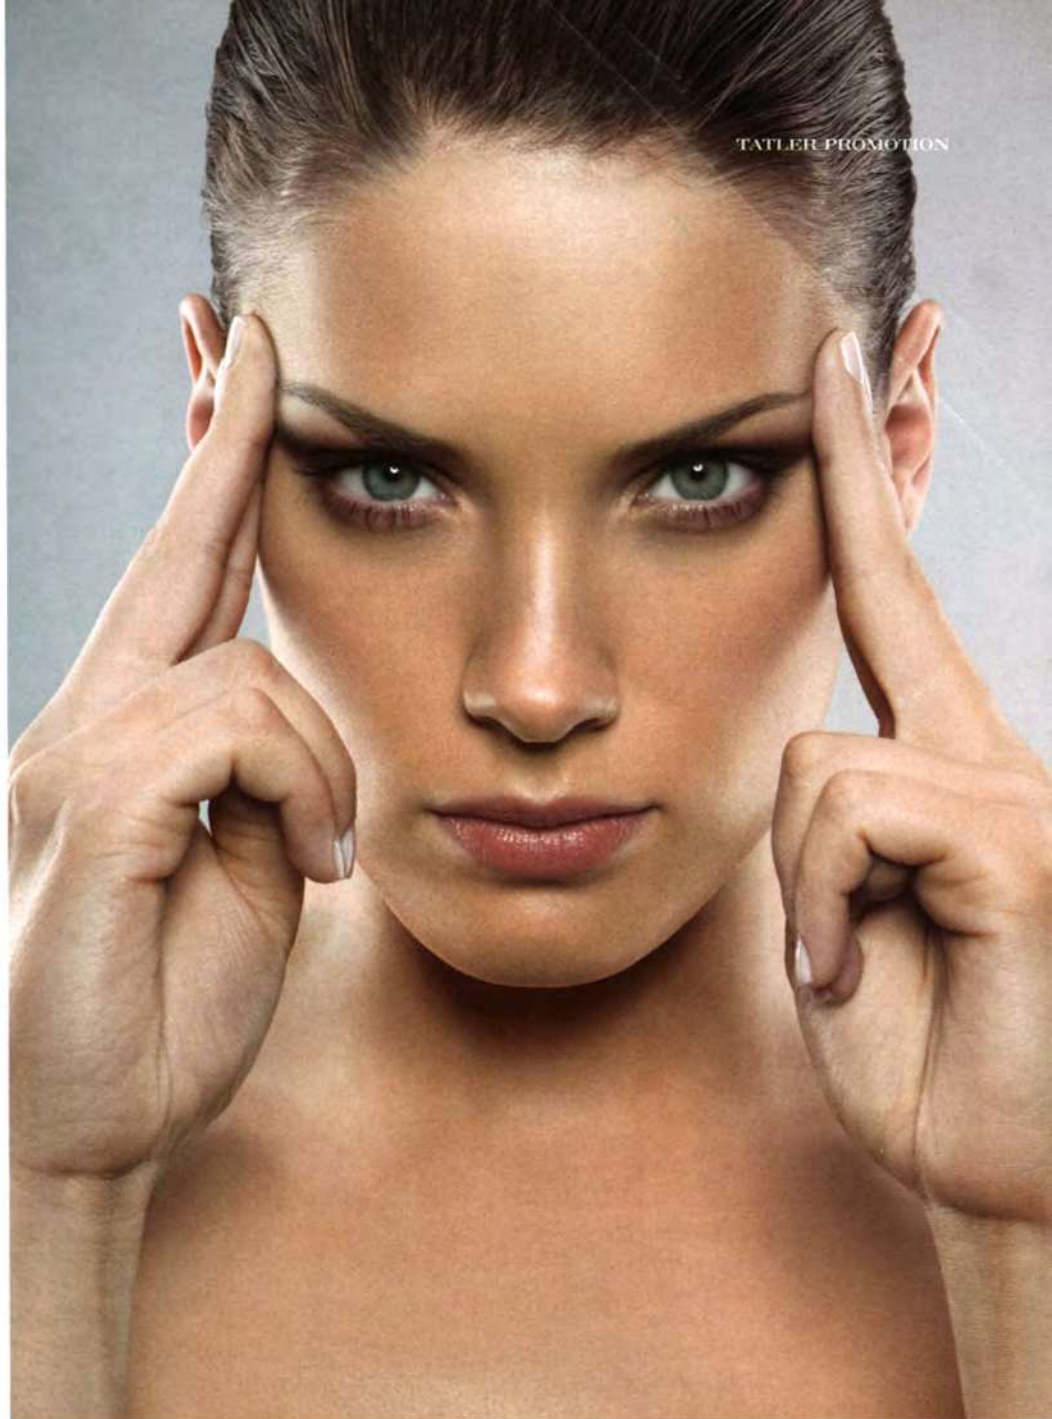

When it comes to ageing gracefully, French women offer the blueprint of subtle elegance. Indeed, the French lead the way in the anti-ageing arena, and for the best of the best, look no further than Dr Dray, France's leading

cosmetic doctor. His clients, including a flock of A-listers, come from all over the world for the beautifully subtle look he achieves. Dr Dray is at the forefront of all the latest advances in technology, and his treatments are now available for you to enjoy at his clinic in London's Kensington.

Dr Dray only has to look at a woman to know exactly which combination of products and treatments she needs to enhance her beauty. One of his best-loved procedures is the 10-minute facelift, which increases the skin's collagen fibres, and involves injections of biphasic tricalcium phosphates (BTCPS), a new biodegradable agent composed of phosphate and calcium ions suspended in hyaluronic acid, to create a facelift effect. The results can be seen almost immediately, but within six weeks, the real effects appear – new tissue, an increase in collagen fibres and improvement in elasticity – all of which lasts for up to 15 months.

He uses all the latest fillers to great effect, plus the very latest Fraxel Restore Dual System to address sun damage, redness, age spots and acne scars, as well as to smooth out fine lines and minimise stretchmarks. This new laser is fabulous for improving the quality and colour of the complexion.

To help make unsightly fine lines a thing of the past, Dr Dray relies on new Botox Xeomin, which does not contain complex protein, ensuring better results than ever before, particularly for the forehead and crow's feet. He chooses the latest Thermage, with an excellent vibrating handpiece, to work on saggy areas such as the neck, jawlines, cheeks and body for a wonderfully youthful effect. He's also the founder of Mesotherapy and the creator of the Mesolift procedure, a non-surgical treatment that hydrates skin and encourages the natural production of collagen.

If your hair is thinning or falling out, Dr Dray's unique Mesohair treatment is the answer, in the shape of a course of painless scalp micro-injections of minerals, vitamins and DHT blockers (DHT is the hormone that causes hair loss) – finally, lustrous hair can be yours.

When it comes to luscious lips, Dr Dray's motto is 'Never too much but always sexy'. He will shape, enhance and subtly plump your lips using natural hyaluronic acid injections for a truly kissable result.

Whichever treatment you opt for, you can feel safe in the knowledge that you will emerge from Dr Dray's clinic looking more naturally radiant than ever before.
